# Accessible Parallel Bars

Model View

## Description

Developed in partnership with New York City Parks Department and physical therapists from Mount Sinai Hospital, the Accessible Parallel Bars allow adults who use a mobility device to perform upper body exercises alongside their peers. The lower set of bars is 34" above the ground and designed for a user to pull him/herself and the mobility device into the bars.

### Features & Benefits

- Compact design shares space with standard parallel bars to promote inclusive fitness experience
- Provides an accessible, upper body workout
- Product requires impact attenuating surfacing to comply with ASTM F3101-15.
