KidNetix X Bridge

Model View

Description

The KidNetix X Bridge is unlike any other climbing experience. The X Bridge sways slightly (up and down, side to side) as children traverse the structure. This swaying motion helps to improve balance and coordination and makes the journey even more fun. Children can start and finish in an upright position, shifting the position of their hands and feet as they cross the bridge, or they can climb up one side and down the other like they are climbing a traditional ladder.

* Uprights not included

Features & Benefits

- Climbing experience that enhances balance and core strength
- X Bridge measures 27.5" wide, bottom ropes are 39.5" high (at lowest point), top ropes are 91" high (at highest point)
- Can be used as a free-standing play event or as part of a KidNetix ropes course
- Super strong, durable nets are constructed of multi-strand steel and encased with rubber and vinyl

Specifications
